

Launch of the Graphene Companies Catalogue The complete graphene landscape

Madrid (Spain): March 10, 2016

Phantoms Foundation is pleased to launch the 3rd edition of the catalogue of companies working in Graphene worldwide.

At this stage (3rd edition) more than 120 institutions are featured on this catalogue. This document will be available during Graphene2016, the largest European Graphene event (Genoa (Italy) – April 19-22, 2016) and will include all those who work hard also in Research Centers, etc. A PDF version will also be online to download after the event.

This initiative comes as an open platform resource to attract global participant's intent on sharing, exchanging and exploring new avenues of graphene-related scientific and commercial developments.

The main goal is to have a source in hand where it would be possible, in just one file, to have an overall view of which companies develop their work on the field. It serves mainly as a valuable source to investors, end-user companies, policymakers, etc. It will be a way to promote interaction, partnerships, synergy and future collaborations for new ways of scientific and commercial developments related to graphene.

Is your company currently working in Graphene? The deadline to fill the form has been extended until March 14.

About Phantoms Foundation: This Non-Profit organization was established in 2002 (Madrid, Spain) in order to provide high level Management profile to scientific projects. This association plays an important role in the 7th Framework Program as a platform for European funded projects to spread excellence amongst a wider audience, and to help in forming new networks.

This Association is now a key actor in structuring and fostering European Excellence in "Nanoscience and Nanotechnology", having a world leading position in organizing conferences, training and dissemination activities in this field.
