

Collaboration - an essential ingredient for nanotech commercialization

Victor Acinas

International Programmes Officer

CCAN - Collaborative Centre for Applied Nanotechnology
Tyndall National Institute, Cork, & CRANN, TCD, Dublin, Ireland

E-mail: victor.acinas@ccan.ie

The successful translation of nanotechnology expertise to industry requires a multi-sectoral and multi-disciplinary approach. Such an approach requires funding mechanisms which are industry-friendly, transnational and flexible. This will enable stronger European performance in nano commercialisation & greater industrial benefit from nano-enabled products.

This talk will present the experience of CCAN in fostering the industrial adoption of nanotechnology and showcase a selection of successful case studies.
