

From Graphene to Phosphorene: the 2D zoo

Antonio H. Castro Neto

Centre for Advanced 2D Materials and Graphene Research Centre

National University of Singapore

6 Science Drive 2, Singapore 117546

The field of two dimensional materials is rapidly expanding with the isolation and synthesis of many atomically thin crystals that present a broad variety of physical and chemical properties which can be exploited in different areas of science and engineering. In this talk I will review the progress in this exciting new area of research.
