

**Prof. M.J. Alonso Lab
is seeking a highly motivated
Postdoctoral Researcher for a project on a new COVID19 nanotherapy**

CIMUS, University of Santiago de Compostela

Project focused on:

- “Development of a new COVID19 therapy in collaboration with a spin-off company and a highly stimulating European Consortium”.

Application Requirements:

- PhD in an appropriate discipline (Biochemistry, Pharmacy, Biology, Biomedical Engineering...).
- Must have previous experience in micro/nanoencapsulation, with emphasis in polymer-based delivery systems and encapsulation of biomolecules (antibodies, peptides, proteins, oligonucleotides, nucleic acids).
- Experience in the analytical techniques (HPLC, LC-MS)
- Excellent writing and presentation skills.
- Upper intermediate level of English or higher.

Previous experience working in industry as a scientific project manager will be highly acknowledged

To apply, please send your CV and cover letter to: purificacion.dominguez@usc.es

DEADLINE: DECEMBER 30TH, 2022
