

Ph.D. student position at Carbon Bionanotechnology Lab

Job Summary

Applications are invited for a multidisciplinary Ph.D. student position at the Carbon Bionanotechnology lab at CIC biomaGUNE to develop innovative analytical platforms based on graphene field effect transistors for the ultrasensitive detection of pathogenic viruses.

We are looking for an enthusiastic and dedicated student with a background in chemistry or material science. Previous experiences with analytical chemistry, nanotechnology, and sensors will be positively evaluated. The candidate will be involved in the chemical modification and the physicochemical characterization of transistor-based biosensors. Furthermore, he/she will evaluate the analytical performances of the platform and their application in real samples.

Education Level:

Master in Chemistry/Chemical Sciences or material science.

Skills:

- Enthusiasm and dedication to science
- Solid background Chemistry
- Experience with Material Science is preferred
- Experience with analytical chemistry is preferred
- Proficiency in English, spoken and written.

Duration:

- Full time contract with a duration of 3 years (Initial contract of 12 months renewable annually up to 36 months).

Envisaged Job Starting Date: March - April 2024

Application Deadline: 2024-02-19

Project Funding:

- FLUFET - 101130125 - (European Commission - Horizon Europe)

About CIC biomaGUNE

CIC biomaGUNE, located in the Science and Technology Park of Gipuzkoa (Donostia-San Sebastián), is a leading research center in the area of bionanomaterials, molecular imaging and regenerative medicine and counts with more than 160 people from 24 countries. The activity of CIC biomaGUNE is conducted by a team of 11 international and dynamic research groups, supported by flexible and efficient management teams and a unique research infrastructure including the Molecular Imaging Facility, one of the biggest preclinical imaging research infrastructures in Europe.

CIC biomaGUNE maintains a vibrant weekly scientific seminar program by visiting leading scientists. Additional training in soft skills and technologies covered by the CIC biomaGUNE technical platforms is offered to researchers within the in-house training program.

CIC biomaGUNE is committed to developing an HR Strategy for Researchers, designed to bring the practices and procedures in line with the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (Charter and Code).

Please check out the Human Resources Strategy for Researchers - [HRS4R at CIC biomaGUNE](#).
