

version 4.0

Catalogue of Nanoscience & Nanotechnology Companies in Spain

Catalogue of
Nanoscience &
Nanotechnology
Companies in Spain
Version 4.0

Index

5 Introduction

7 N&N Companies in Spain

61 Statistics

67 Other Tech Transfer Institutions in Spain

This catalogue (version 4.0, updated July 2013), compiled by the Phantoms Foundation (coordinator of the Spanish Nanotechnology action Plan funded by ICEX), provides a general overview of the Nanoscience and Nanotechnology companies (96) in Spain and in particular the importance of this market research, etc.

Note: only those contacted companies which provided their details are listed.

The Phantoms Foundation based in Madrid, Spain, focuses its activities on Nanoscience and Nanotechnology (N&N) and is now a key actor in structuring and fostering European Excellence and enhancing collaborations in these fields. The Phantoms Foundation, a non-profit organisation, gives high level management profile to National and European scientific projects (among others, the COST Bio-Inspired nanotechnologies, ICT-FET Integrated Project AtMol and ICT/FET EUPHONON Coordination Action) and provides an innovative platform for dissemination, transfer and transformation of basic nanoscience knowledge, strengthening interdisciplinary research in nanoscience and nanotechnology and catalysing collaboration among international research groups.

The Foundation also works in close collaboration with Spanish and European Governmental Institutions to provide focused reports on N&N related research areas (infrastructure needs, emerging research, etc.).

The NanoSpain Network - www.nanospain.org - (coordinated by the Phantoms Foundation and the Spanish National Research Council (CSIC)) scheme aims to promote Spanish science and research through a multi-national networking action and to stimulate commercial Nanotechnology applications. NanoSpain involves about 342 research groups and companies around 2500 researchers, technicians, etc.

The Phantoms Foundation is also coordinator of the Spanish Nanotechnology Plan funded by ICEX Spain Trade and Investment - www.icex.es - under the program España, Technology for Life, to enhance the promotion in foreign markets of Spain's more innovative and leading industrial technologies and products in order to:

1. Represent the scientific, technological and innovative agents of the country as a whole.
2. Foster relationships with other markets/countries.
3. Promote country culture of innovation.
4. Better integrate the Spanish "Science - Technology - Company - Society" system in other countries.
5. Generate and develop scientific and technological knowledge.
6. Improve competitiveness and contribute to the economic and social development of Spain.

ICEX Spain Trade and Investment in collaboration with the Trade Commissions of Spain and assisted by the network of Spanish Embassy's Economic and Commercial Offices and, within Spain, by the Regional and Territorial Offices, are serving Spanish companies to promote their exports and facilitate their international expansion. ICEX Spain Trade and Investment is part of the Spain's Ministry of Economy and Competitiveness.
